Christoph, Karl Richard, Matthias and Volker Lindenschmidt

Years of experience_

LINDENSCHMIDT UMWELTSERVICE, run by Karl Richard Lindenschmidt and his three sons Matthias, Christoph and Volker Lindenschmidt, is a medium-sized family company specializing in waste management with customers throughout Germany and Western Europe. The success story began in 1959, when Margaretha and Karl Lindenschmidt founded the company under the name "Siegerländer Abfuhrbetrieb" with one 3 m³ vacuum tanker.

Continual development has led to success in a dynamic market

LINDENSCHMIDT UMWELTSERVICE owes its success to realising market opportunities while simultaneously taking the protection of the environment into consideration.

The former "Siegerländer Abfuhrbetrieb" has since developed into a modern hi-tech company with a staff of 200. This is due to the on-going development of new machinery and technical equipment. The number of trucks and special vehicles both for industrial and inner-city cleaning as well as for waste collection has steadily increased.

Recycling/recovery is a subject which is justifiably of great public interest and this is where LINDENSCHMIDT UMWELTSERVICE, with its innovative and creative approach, can offer individual solutions.

UMWELTSERVICE LINDENSCHMIDT

Environmentally-friendly solutions in the hands of one company_

We take responsibility

LINDENSCHMIDT UMWELTSERVICE is known for its technical competence and offers a wide range of services from the treatment and recovery of dangerous waste, cleaning of industrial plants, sewerage systems and public roads to the maintenance of oil separators and the use of water power as a cleaning tool. We have an individual solution for every application because we feel responsible for the protection of natural resources and the environment.

Waste management is a matter of trust_

How can we help you?

Companies which focus on what they do well are successful. This is particularly true for the management of hazardous waste. LINDENSCHMIDT UMWELTSERVICE is a reliable partner. Our systematic work starts right on site. We are authorized to deal with more than 830 types of waste in all hazard categories. We work in numerous capacities for industry, trade and local authorities in Germany and other European countries.

We have effective solutions for the handling of any kind of post-production waste for companies of all sizes. These include safe transport, recycling/recovery and the ultimate disposal. Leave your problems with dangerous waste to us. We can solve them at a fair Lindenschmidt price.

Systematic collection and transport

Protect the environment and your budget by using the Lindenschmidt collection system. You can hire a variety of containers at reasonable prices. For this reason we are very flexible and are able to offer optimum waste management concepts of a high technical standard.

The quality of our collection system is documented by our appointment as a "certified inspection agency" for containers.

If you prefer to deliver your waste yourself, we're the company for you. We can also handle all the administrative work for you, swiftly and efficiently.

No waste management without control_

Safe waste management concepts

LINDENSCHMIDT UMWELTSERVICE provides an all-round waste management system. Our analytical laboratory is fully integrated into our operation and forms an indispensable part of our service. It enables us to comply with the stringent legal requirements for environmental protection and to meet all safety standards in treating hazardous waste.

Our laboratory – the analytical interface

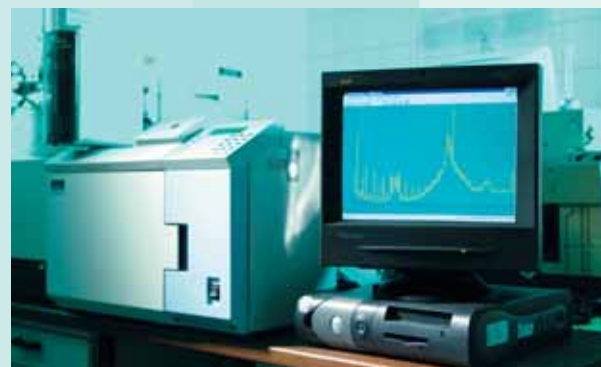

We want to know and need to know the exact nature and composition of the substances we deal with.

Our exceptionally well-equipped laboratory, which complies stringently with waste legislation, is the key to safe process engineering. The first thing we do is analyse samples which provide us with information regarding the origin of the waste and the next steps to be taken. The test results are based on the most advanced analytical technology and determine the measures to be taken either for recovery or disposal.

Documentation creates safety

From our wide experience in many branches of industry we have learned how best to implement procedures in the collection, processing and disposal of waste. All test results and analyses of samples are collected and documented using an advanced IT system. The end result is transparency and a higher degree of safety for all parties involved.

Our Waste Management Centre: environmentally sound and efficient_

High process engineering standards

Environmental protection deserves the best technology. LINDENSCHMIDT UMWELTSERVICE is extremely creative in the technical implementation of new ideas. In our Waste Management Centre more than 100,000 tons p.a. of hazardous waste are treated, processed and if possible recycled. That means, our treatment plant for physical and energetic recovery is being constantly enlarged and modernized. Our technical expertise is used to meet the ambitious process engineering standards. Today our waste management centre meets all the legal requirements for the professional handling of hazardous waste.

We have a taste for your waste

LINDENSCHMIDT UMWELTSERVICE guarantee its customers that all waste streams are geared to environmentally compatible destinations. Thanks to our long-standing practical experience with dangerous waste, a high degree of recovery is achieved. The waste management centre demonstrates the wide range of recovery processes. It is surprising to see to what extent hazardous materials can be recycled/recovered. Lindenschmidt customers can be sure that thanks to our efficient treatment technology we can guarantee the optimum recovery potential in waste processed in our plant. Any materials which cannot be recycled are disposed of in environmentally sound procedures.

Around the clock: safe, swift and clean_

Systematic cleaning

Industrial and inner-city cleaning are traditionally the key activities of LINDENSCHMIDT UMWELTSERVICE. We possess an advanced pool of machinery, equipment and vehicles for cleaning industrial plants, sewerage systems and road surfaces. Furthermore, we are fully equipped for the dismantling of installations, reconstruction work and dealing with accidents. We have experienced staff and the right equipment for all kinds of services. Naturally, we guarantee an ecological disposal of residues. That's the Lindenschmidt concept for cleanliness.

Flexibility is our strength – any time

Whatever we do, flexibility is our strength. This goes for waste management and cleaning alike. A dirty sewerage system is no problem for our special vehicles and equipment. We know what to do to deal with problems swiftly and effectively in the shortest possible time. Our service means "being prepared for emergencies, safely". Our safety and emergency services are on alert around the clock.

Oil separation services

LINDENSCHMIDT UMWELTSERVICE carries out expert maintenance and ensures the separators function efficiently to protect sewerage systems from oil spills. This service is controlled by a large number of laws, regulations and standards. Being a certified specialist we undertake all maintenance and diagnostic work as well as emptying, cleaning and sludge disposal. With our full service you can have complete control of your separation systems, at reasonable prices.

Alternatively you may wish to make use of our training sessions to qualify your own staff for some of these tasks.

Further Services_

Water can be a useful tool

Our high-pressure water jet equipment is perfect for the thorough cleaning of machines, installations and surfaces. This technology is also used for repairs to roads and bridges and for the removal of rubber chippings on runways. The high-pressure units work vibration-free with a maximum water pressure of 2,500 bar, ensuring the protection of both the environment and the materials.

Cleanliness and safety on roads and paths

LINDENSCHMIDT UMWELTSERVICE is the preferred partner of local authorities, trade, industry and construction sites. Street cleaning has been one of our standard services since 1969. We provide cleanliness on roads and paths, at any time and in any weather with our modern road sweepers and road washing vehicles.

Emergency service to ensue your safety

Our emergency service can be called, for example, in the case of an accident involving dangerous substances or in the case of fire damage. Our laboratory experts, engineers and our company fire brigade with their professionally equipped vehicles are always on call.

These services are backed by our Central Service Centre with more than 80 special vehicles which are maintained and checked thoroughly by our expert staff in our own garage. This ensures that we are always ready for any eventuality which concerns your safety.

You can count on us_

Thorough consultation – reliable calculation

Individual solutions but good value for money. Before LINDENSCHMIDT UMWELTSERVICE takes care of your waste or provides a service, we will arrange a thorough consultation as a basis for safe, trustworthy and thorough work. You will be informed how your waste will be dealt with and how much it will cost. You can rely on the expertise of our staff. Our modern IT-systems ensure exact compilation of all service data to achieve the utmost cost transparency. Simply count on us!

Waste producers have duties, too

If your company produces dangerous waste, you are expected to meet a number of requirements: waste balances, waste management concepts and other documents to comply with waste legislation. Do not despair of the jungle of regulations – make use of the Lindenschmidt know-how instead. We can give you advice on all matters regarding waste management. Let us deal with bureaucracy and legal requirements for you. We know the rules, in theory and in practice.

- We are a Certified Waste Management Company
- Our Quality Management System has been audited according to DIN EN ISO 9001:2008
- We are Certified Experts in accordance with the Wasserhaushaltsgesetz (Water Protection and Resources Act)
- We are Certified Experts in Oil Separation Technology
- We are a Certified Inspection Agency for IBCs

We are prepared to share our knowledge_

Our expertise can be to your benefit

Since nearly 60 years LINDENSCHMIDT UMWELTSERVICE has followed the golden rule, "we may be good – but what can we do better"?

This has become the guideline for our day-to-day work and a challenge for us all. In-service training and improving technical qualifications are the backbone of our work.

We don't want to keep all our knowledge to ourselves

We have been holding regular training sessions in our Customer Information Centre since 1997. The subject matter of these seminars is based on the most recent developments in technology and current legislation. You may be able to take advantage of these, too. At our visitors days we answer all questions, which are important for you as a "waste commissioner" in your company. Furthermore, we regularly offer seminars where you can qualify as an "expert for internal control of oil separation systems" or as an "expert as per § 6 Gefahrgutbeauftragten-Verordnung" (regulations for personnel in charge of hazardous substances). Come and join our training sessions – any improvement in your waste management activities will pay off!

Education will secure future

For Lindenschmidt this is not just lip service. We offer apprenticeships for the following professions: "Expert in recycling and waste management", "chemical laboratory assistant", "car mechanic", "industrial clerk" and "office clerk". Furthermore, we offer professional training for graduate engineers in the field of environmental technology in cooperation with universities.
